OVERVIEW

Computer Science student with a keen interest in Full-stack development and Backend systems. I enjoy building web applications using React, Node.js, and Python, and I've been exploring ways to integrate Agentic AI into my projects. I'm a disciplined learner who loves breaking down complex problems and working with others to build clean, effective software.

EDUCATION

University of Phayao <i>BSc in Computer Science</i> GPA: 3.52 Languages <i>Thai (Native), English (Basic)</i>	Phayao, Thailand <i>June 2022 - Present</i>
---	--

SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, PHP, Matlab Web Development: React, Node.js, Next.js, FastAPI, Tailwind CSS AI & Machine Learning: Pandas, Scikit-learn, LangChain, AutoGen Studio, YOLO, PyThaiNLP Tools & Databases: MySQL, PostgreSQL, Git, GitHub, Figma, XAMPP Other Skills: Deep Learning, Unity Soft Skills: Problem Solving, Team Collaboration, Critical Thinking, Active Listening	
--	--

PROJECTS

Writings Scoring System With Agentic AI (Final Project / Team Project) - Developed a web-based exam platform using React and Node.js to grade subjective answers. - Implemented Agentic AI with AutoGen Studio to suggest scores based on teacher and student answers. - Visualized student performance with charts and keyword-based evaluation.	March 2024
Face Recognition (Team Project) - Web to forecast classmates and check if they're wearing glasses. - Collect face data from classmates and create a YOLO model.	October 2025
Smart Tax (Team Project) - Developed OCR-based system to extract text from receipts. - Using text mining techniques to classify receipts for tax deduction categories.	November 2025
Agents Analysis Stock Web (Team Project) - Created Agents Workflow to analysis stock using different categories datasource. - Manage the backend system and contact devops team to deploy.	January 2026
RPCA Select Stock (Team Project) - Applied Robust Principal Component Analysis (RPCA) to choose the best of stock. - Collection Data in each size(Assets, Sector, Stock).	February 2026

EXPERIENCE

Guest Lecturer - KNN Taught the basics of model creation (KNN) and performance evaluation to junior students.	July 2025
Guest Lecturer - K-means Provided lessons on foundational concepts and implementation of K-means clustering.	July 2025
TRINITY (Data Science Intern) Data collection, model building and back-end system management.	November 2025 - February 2026
